

## Assignment 1

Initialize a new Git repository in a directory of your choice. Add a simple text file to the repository and make the first commit.

ANS:

- `$ git init`
- `$ git status`
- `$ git add .`
- `$ git remote add origin https://github.com/Komalondhe/gitInfo.git`
- `$ git config --global user.name "komalondhe"`
- `$ git config --global user.email "komallondhe835@gmail.com"`
- `$ git commit -m "Initial Commit"`
- `$ git push -u origin main`

Quick setup — if you've done this kind of thing before

 Set up in Desktop or  HTTPS  SSH  

Get started by [creating a new file](#) or [uploading an existing file](#). We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

...or create a new repository on the command line

```
echo "# gitInfo" >> README.md
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin https://github.com/Komalondhe/gitInfo.git
git push -u origin main
```

...or push an existing repository from the command line

```
git remote add origin https://github.com/Komalondhe/gitInfo.git
git branch -M main
git push -u origin main
```

Activate Windows  
Go to Settings to activate Windows.
